ER 83-5144

DDA 84-0575/1

MEMORANDUM FOR: Executive Director

FROM: R. E. Hineman
Deputy Director for Science and Technology

SUBJECT: Foreign Language Reserve

REFERENCE: Memo for DDS&T from EXDIR, dated 22 Feb 1984
Same subject, ER 84-268/4

1. This memo responds to your request for comments on the most effective way to comply with the Director's desire to enhance the Agency's reserve language capability. We have identified three ways to enhance the Agency's reserve foreign language capability: 1) using a list of FBIS annuitants as a starting point for the foreign language reserve, 2) improving the administrative procedures to bring annuitants into such a program, and 3) encouraging current employees to acquire needed languages and compensating them accordingly

25X1

2. In your memo you stated that the FBIS roster of annuitants working under contract with the Joint Publications Research Service (JPRS) may be a useful mechanism for augmenting linguists during a crisis. This roster, in fact, could be used as point of departure for creating a foreign language reserve. Of the [] linguists that JPRS has under contract [] are CIA annuitants, but only [] of these have [] retained their Agency clearances. JPRS has contracts with [] other government annuitants who are non-Agency retirees. A number of these people worked at State, NSA, and DoD and probably had security clearances. FBIS is preparing a JPRS annuitant list for use by the Foreign Language Committee. Once the language capabilities of the CIA annuitants have been exhausted, retirees from other agencies could also be drawn upon.

25X1

25X1

25X1

SECRET

DCI
EXEC

B-200

SUBJECT: Foreign Language Reserve

3. We need to do a better job in dealing with the Intelligence Community retirees who can provide a significant surge capability. All too often unreasonable administrative burdens are placed on the retirees. We need to streamline these administrative and security procedures. The prime objective should be to encourage retirees to actively seek participation in a surge capability program. Such a program should instill a sense of pride and be an honor to serve in. We must insure that retirees are adequately compensated for their efforts, both when qualifying for employment and when performing the job. [redacted]

25X1

4. We should try to predict our "surge-requirement" languages. By so doing, we can plan for needs by encouraging employees to acquire the needed skills through a Language Incentive Program. Any employee could be paid to achieve, then maintain the language skill. This program would also pay language-qualified employees a full salary for a two-week-per-year duty with NSA or FBIS to use their skills and update their knowledge of the language area. Then, when and if the need arises to use the language, we could treat the use similar to flight pay, i.e., if used one day, that particular pay period would receive a use award. [redacted]

25X1

[redacted] 5. As other ideas come forward we will send them to you.

25X1

Honorable John N. McMahon
Deputy Director
Central Intelligence Agency
Washington, D.C. 20505

Dear Mr. McMahon:

I share your concerns prompting the creation of an Intelligence Community Linguist Pool. One of the most important actions in the creation of such a pool has already begun. The Department of Defense Manpower Data Center has been tasked to develop a DoD-wide foreign language ability and performance inventory. The security clearance status of the linguist will also be available, making this inventory very useful in meeting linguist surge requirements. Additionally, a study is currently underway to determine the capability of the reserve component to support the linguist pool. We will support further actions required to achieve the activation of the linguist pool through our representative on the Foreign Language Committee.

Sincerely,

J

16 MAR 1984

MEMORANDUM FOR: Executive Director

FROM: Harry E. Fitzwater
Deputy Director for Administration

SUBJECT: Foreign Language Reserve

REFERENCE: Your memo, same subject, dtd 22 Feb 1984 (ER 84-268/4)

1. This is an interim response to your request because all of the parameters of the Foreign Language Reserve Program (FLRP) have not yet been determined. For example, without knowing if FLP members are going to be required to maintain a specific skill level, and/or to be tested periodically (and how often) at Agency expense or how Agency reservists would be paid if called up for another agency, etc., it is not possible at this point to determine exactly how the planned contract and procedures for the inactive element of the Agency Civilian Reserve Program (ACRP) may be modified to accommodate the FLP. While both programs are similar in their basic intent to provide a surge capability, the specifics of the FLP may be dissimilar enough to dictate separate administration.

2. I understand that [redacted] IC Staff, is working with [redacted] Chairperson, Foreign Language Committee, and other members of the Intelligence Community in developing the specifics of a Community-wide program to be administered basically within each participating Agency. At a meeting on 9 March 1984 with [redacted] FBIS, [redacted] and [redacted] OP, [redacted] /OP agreed to obtain, if possible, a listing of Agency retirees from 1974 who possess any of the languages of interest to the Community when those languages are identified.

25X1

25X1

25X1

25X1

3. As soon as some of the basic details have been fleshed out by [redacted] we will be in a better position to determine if and how the ACRP may be modified to accommodate the FLP or if another mechanism would be more effective. We will continue to work with [redacted] and [redacted] and will advise you further at a later date.

22 FEB 1984

Att. FLC OOO-84
SC 01166-83
ER 83-5744MEMORANDUM FOR: Deputy Director for Administration
Deputy Director for Science and Technology

FROM: [redacted]

25X1

Executive Director

SUBJECT: Foreign Language Reserve

1. Recent correspondence between the DCI and the Chairman of his Foreign Language Committee (FLC) focused on the ability of the Intelligence Community to round up on a surge basis people with foreign language qualifications. In a follow-up action, the DDCI directed the Committee to establish a Community language reserve. His specific charge to the FLC is attached for your information. [redacted]

25X1

2. The Director suggested that the inactive element of the Agency Civilian Reserve Program and the FBIS roster of annuitants working under contract with the Joint Publications Research Service (JPRS) represent useful mechanisms for augmenting CIA's active duty corps of linguists during crises. The inactive element of the Agency reserve program, now in its formative stage, seems to represent the most attractive of these two approaches; the resource implications would be modest, and it would be relatively easy to obtain security approval for members upon activation. The FBIS roster of JPRS translators may offer less promise for flexible employment as a reserve, and its augmentation for this purpose could pose a resource problem. As I recall, most of these contractors are not CIA annuitants, and they are all actively employed and deal only with unclassified material. [redacted]

25X1

3. I would appreciate hearing your views soon on the most effective way to comply with the Director's desire to enhance the Agency's reserve language capability so that I may advise him of our intended actions in this regard early in March. [redacted]

MEMORANDUM FOR: Chairman, Foreign Language Committee

SUBJECT: Community Linguist Pool [] 25X1

REFERENCE: Your Memorandum to the DCI, Same Subject
[] 9 December 1983) 25X1

1. Thank you for your thorough assessment of the feasibility of creating an Intelligence Community pool of linguists for surge requirements. Tapping the linguistic ability of Community annuitants or reservists is certainly one useful avenue to explore. [] 25X1

2. I would like the Foreign Language Committee to be the focal point for this effort. The Committee should:

-- serve as the Community repository for details on the ability of Community elements to augment on a surge basis their respective active duty corps of linguists;

-- keep the DCI apprised of the Community's continued overall ability to respond to emergency situations requiring such augmentation; and

-- provide a Community forum for addressing issues pertaining to interagency linguistic support. Occasionally, you may also be asked to coordinate Community responses to particular linguistic needs. [] 25X1

3. The first task the Committee should undertake is to create an inventory of linguistic resources available to the Community but not currently employed. Specifically, we need to know the variety and level of supplemental linguistic support we could presently muster if required, the extent to which security or other considerations would hinder employment of this cadre, and what would be required to improve its flexibility. You should then tackle the longer-term question of how best to fill the gaps in this nucleus and maintain appropriate skill levels. Your Committee members should be able to keep you abreast of the individual efforts already underway in the Community to develop reserve pools of linguists tailored to their individual needs. Defense efforts to update pertinent DoD data bases with current language proficiency test results should, of course, be encouraged. []

MEMORANDUM FOR: Executive Director
FROM: Director of Central Intelligence
SUBJECT: Feasibility of Creating a Community Language Reserve

It seems to me we can easily implement this language reserve along the lines you suggest. Make a push to bring a significant number of annuitants with language capability into the inactive reserve, add to the FBIS roster, get the Foreign Language Committee a couple of people, encourage and support and get inventory of the language skills of the Uniformed Services. Have a nucleus on which you can build slowly and fill in the gaps. Do the best we can as the thing develops to provide language maintenance opportunities but don't hold everything while that's being done.

If you have any problems on marching ahead on this, let me know.

William J. Casey

SECRET

ww Approved For Release 2008/05/21 : CIA-RDP86M00886R000300030003-6

Re tracking foreign language corps, DCI has picked up your approach but also included addition of people to the Foreign Language Committee to do the job.

While there is a CIA role in all this, [redacted] is the midwife.

You might consider speaking to the DDCI about keeping the program lean, offer to have PS draft an implementing instruction to [redacted] from him, and have him (DDCI) mention to DCI what has been done (sans additional staffing).

STAT

STAT

Central Intelligence Agency
Washington, D.C. 20505

28 December 1983

Executive Director

A *28 DEC 1983*

NOTE FOR THE DDCI
DCI

- Tapping linguistic ability in annuitants or other potential reservists makes all kinds of sense. Linguistic requirements, as well as operational/other, were included in our structuring of a CIA Reserve Cadre. Thus, both NSA ([redacted] para. 2) and CIA have linguistic reserve programs, the latter drawing also on the JPRS pool.
- As [redacted] para. 3 indicates, the Services have records of their Reservist's language skills and a proposal to update their data base with current language proficiency test results. This should be encouraged.
- I would think that the most productive and least bureaucratic results could come from these several components completing action on their individual programs.
- I would also think that, without having to add Staff, the Foreign Language Committee could serve, when necessary, as an informed switchboard. (Some across-Agency cooperative examples: Air Force detailees to DO/SE to exploit technical materials; recent DDO proposal to have DO annuitants assist in emigre exploitation where Services lacked linguistic talent; periodic DO assistance to the FBI; etc.).

Central Intelligence Agency
Washington, D.C. 20505

27 December 1983

Executive Director

NOTE FOR THE DDCI

- Linguistic requirements as well as operational/other were included in our concept of a CIA Reserve - thus the idea of a "linguistic reserve" is, for us, a given need. I also support the idea of individual Community rosters.
- The creation of a Community Reserve, with increased IC Staff positions and the inevitable bureaucratic/managerial/security hassle does not appeal at all.

25X1

9 December 1983

MEMORANDUM FOR: Director of Central Intelligence

VIA: Deputy Director of Central Intelligence
Director, Intelligence Community Staff *EB*
Deputy Director, Intelligence Community Staff *GR*FROM: [redacted] 25X1
Chairman

SUBJECT: Feasibility of Creating a Community Language Reserve

1. The Foreign Language Committee has considered the problem of providing the Community with a capability "to round up on a surge basis people with unusual foreign language qualifications" as well as the possibility of providing on an ad hoc and temporary basis, assistance to any one Community member for critical operational use, personnel with foreign language skills from other members of the Community. I have reviewed the memorandum prepared, at your request, by the DDA in August 1981, and have discussed this problem with representatives of the Department of Defense (including NSA, DIA and the Uniformed Services), State, CIA, and the FBI. [redacted]

25X1

2. One essential element of a linguist reserve would be the maintenance by each member of the Community of its own roster of reservists/retirees whose language skills have been tested according to Community accepted proficiency standards. Such individuals would also have to be given the opportunity to maintain their skills and be given security clearances well in advance of any anticipated need. At the present time, only NSA has a linguist reserve. "Pursuant to Public Law 97-89, the Director, NSA/Chief, CSS authorized the establishment last year of a Cryptologic Linguist Reserve Program (CLRP). This program allows the Agency to designate, train, and compensate former (usually retired) NSA linguists to fill language shortfalls in certain emergency situations as determined by the Director, NSA. While the number of participants in this program is now small, the Agency is seeking ways to expand it, and the CLRP promises to be more useful as retiring linguists join the program when they leave the Agency." [redacted]

25X1

[redacted] 25X1
copy no. 1

SECRET

[redacted] 25X1

25X1

SECRET

SUBJECT: Feasibility of Creating a Community Language Reserve

3. The reserves of the Uniformed Services do indeed include individuals with specific language and area skills. However, for the most part, such reservists have not been recently tested and their actual skills may not match those recorded in the data banks. There is presently a proposal for the Defense Manpower Data Center (DMDC), in conjunction with the Defense Language Institute's Foreign Language Center, to expand existing DMDC data basis to include language proficiency data on active duty military personnel, reservists, and civilians. Once this data base has been so revised the DFLC would hope to institute a periodic retesting of active duty personnel against Community accepted proficiency standards. This would ensure that when such individuals enter reserve status their proficiency standards would be known. The General Officers Steering Committee of the DFLC is presently considering the establishment of some five centers (both in the U.S. and abroad) for language maintainence, primarily for active duty personnel. It is hoped that such centers might also eventually be used for reservists as well.

25X1

4. CIA's Foreign Broadcast Information Service (FBIS) maintains a roster of some persons, many of them annuitants from CIA and other Community elements, who are skilled translators working under contract with the Joint Publication Research Service (JPRS) and whose proficiency levels are known. However, such individuals deal only with unclassified materials and their use in an emergency would be greatly restricted unless they were pre-cleared for handling classified information. A linguist reserve for the CIA as a whole could be created in conjunction with the newly formed Agency Civilian Reserve Program, and we shall discuss this with appropriate Agency authorities.

25X1

25X1

5. A Community-wide linguist reserve program could be established and administered by the FLC but only with considerable augmentation of resources. At present the Committee is served only by an Executive Secretary and a part-time secretary. Were it to be charged with creating and maintaining a Community linguist reserve it would require at least two additional personnel, one of whom should be a data processor.

6. If a Community linguist reserve is established, broadening it to encompass other elements of the Government could, possibly, be accomplished through the Interagency Language Round Table on which all elements of the Community are represented. A national language reserve would require, as well, the cooperation of academia and such organizations as the Social Science Research Council and the American Council on Education, to name but a few.

MEMORANDUM FOR: Chairman, Foreign Language Committee
FROM: Director of Central Intelligence

1. Thanks for your response to my request for concise information about what the committee is doing, how well it is doing, and how it might do better.
2. I recently asked the DDA, I believe it was, for a report on what provisions have been made to round up on a surge basis people with unusual foreign language qualifications if they should be needed. This question was raised by Senator Schmitt of the PFIAB in connection with the proposed CIA reserve. I would like to know what arrangements there are or should be on a community basis to keep track or maintain a roster of people anywhere in the country who have special language qualifications which might be required in an emergency or for other special purposes.
3. What kind of staff does the Foreign Language Committee have to get its work done?

William J. Casey
